MEASUREMENTS AND SIZING

In order to ensure the best possible fit, we highly recommend measurements be taken by a bridal store preferably one that carries the designer of the dress you are measuring for. If you are unable to be measured by a bridal store, a professional tailor/seamstress can provide the service. This is an important part of the order process; accurate measurements will enable you to select the size that will give you the best fit. Make sure to keep the tape snug but not tight when measuring. Also, make sure to always measure in just your undergarments for the most accurate fit.

HOW TO MEASURE

Bust: *Measure around the bust and back at the fullest part of your bust.*

Waist: *Measure around your natural waist (the narrowest part of your waist, not where your pants sit). Do not suck in!*

If you plan on losing weight we still recommend ordering the size you are falling into currently, the dresses can always be taken in.

Hip: *Measure 8" down from your natural waist, at the fullest part of your hip.*

FINDING YOUR SIZE

After you have completed your measurements, refer to the size chart above and decide which size you fit into best. Keep in mind that your usual dress size may vary from the size you choose. If your measurements fall in between two sizes, we strongly recommend selecting the larger size. It is always easier to take a garment in than letting it out when doing alterations.

Please remember that the dresses are not made to measure and will require alterations. We do not provide alteration services. The size charts above reflect body measurements, not garment measurements. We are not responsible for any alterations made after you receive the garment from us.
